

# LASERXCHANGE COMPATABILITY LIST - MAY 2006

The following is a list of printers for which we offer a remanufactured product, or for which we are collecting empty cartridges.

Those marked with \* are cartridges we are collecting empties for, or are currently under development.

Some engines are used for different printer makes, but with slight variations in the cartridge body shape, making the various versions incompatible.

Those marked with a double asterisk\*\* are compatible only as a Laserexchange product, where we make a universal product

Those cartridges marked with a gate symbol #, are versions of the Xerox N32 cartridge.

Each cartridge contains a computer chip with printer specific information, so the cartridges are not cross compatible, and appear as separate products on our price list.

Whilst we strive to keep this listing accurate and up to date, we can accept no responsibility for any errors or omissions

Next to each printer entry is a Laserexchange product code - please refer to the price list and Cartridge Recognition Chart for more information.
